

| Country | Operator | Type of measure* | Description of the measure | ISP only | ISP only | ISP only | How is the user informed? | Can the user activate/deactivate the measure? How? | Protection of business secret |
|---------|----------|--|----------------------------|--|--|---|---------------------------|--|-------------------------------|
| | | | | Objective | Method of implementation (if applicable) | Number of subscribers having a subscription where this measure is implemented | | | |
| DE | | User's access is blocked/throttled, e.g. after having downloaded/uploaded a certain amount of data. | [Redacted] | | | | | | |
| DE | | If you offer specialized services (e.g. facilities-based telephony and television over broadband as opposed to "over the top" applications), how does this affect the Internet access traffic on the same access | | | | | | | |
| DE | | Different priority levels within Internet access traffic | | | | | | | |
| DE | | Examples of measures that depend on the type of protocol or application (mail, video, web, etc.) accessed via Internet: P2P file sharing is blocked/throttled | | | | | | | |
| DE | | VoIP is blocked/throttled | | | | | | | |
| DE | | Other specific kind of traffic (port, protocol, application, usage, etc) is blocked/throttled | | | | | | | |
| DE | | Specific application/content provider (e.g. website or VoIP provider) is blocked/throttled | | | | | | | |
| DE | | Specific type of over-the-top traffic given preferential treatment (e.g. specific content/application and/or specific application/content provider) | | | | | | | |
| DE | | Restriction on the type of terminal allowed, or tiered pricing depending on the terminal used | | | | | | | |
| DE | | Other relevant practice | | To be completed with other types of measures - add as many lines as extra practices. | | | | | |

* If several effective measures fall in the same category, add one line per measure

Expected answer:

Description of the measure, in terms of impact for the users
Reasons for the implementation of the measure (e.g. congestion management, network security, law enforcement, commercial terms)
How the measure is implemented (technically) and, if applicable, which conditions trigger it (e.g. threshold of data consumption). If the measure is not technically enforced, state: "N/A".
Number of subscribers to the packages where this measure is implemented
Quotation of the relevant contractual terms, plus any other type of information given to the user.
Yes' or 'No' If Yes, specify how, technically (which actions have to be taken by the user) and commercially (free/paying option).
If some information in a specific row is considered confidential, please mention precisely which parts should not be individually disclosed, and why. Reminder: in any case, all information is subject to publication, at least in a form that will be anonymous (generally aggregate).

| ISP only | | |
|----------|----------|---|
| Country | Operator | Total number of subscribers to packages that include a fixed access to the Internet (mobile: see other tab) |
| DE | Kabel BW | [Redacted] |

| Country | Operator | Open questions regarding traffic management | Response |
|---------|----------|---|------------|
| DE | | What kind of application-agnostic traffic management techniques is used for e.g. congestion management? | [Redacted] |
| DE | | What technologies (e.g. DPI) are used in the network to differentiate between packets? | |
| DE | | Where are these techniques implemented in the network? (e.g. close to interconnection points) | |
| DE | | Are there some plans for implementing additional traffic management practices in the future? | |

| Country | Additional open questions |
|---------|---------------------------|
| DE | Any additional comment |

Comments on any other conditions that may impact users' ability to access the
